DETAILED ACTION

Election/Restrictions

- 1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-7, and 20-25, are drawn to a method for the expression of high yields of active protein-lg fusions, classified in class 435, subclass 71.16.
 - II. Claims 8-11, 16-19, and 26-29, are drawn to protein products and pharmaceutical preparations, classified in class 530, subclass 387.3.
 - III. Claims 12-14, are drawn to a method for making a pharmaceutical product, classified in class 435, subclass 69.71.
 - IV. Claims 30-33, and 36, are drawn to a pharmaceutical preparation comprising an active protein-lg fusion having an altered lg-Fc domain, classified in class 424, subclass 134.1.
 - V. Claims 34-35, are drawn to a method of making an altered Ig-Fc domain, using a mutagen classified in class 435, subclass 69.1.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I, III and V are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions differ because they are drawn to materially distinct processes that have different outcomes, effects and operations. The invention of group I is drawn to a method of expressing high yields of protein, the invention of

Application/Control Number: 09/767,370

Art Unit: 1642

group II is drawn to a method of making a pharmaceutical composition, and the invention of group V is drawn to a method of making a mutagen by using a mutagen.

All these processes have different purposes and outcomes that are distinct.

- 3. Inventions II and IV are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions differ because they are drawn to different product that are used for different purposes. The invention of group II is drawn to a protein product and pharmaceutical compound that can be used for *in vivo* treatment, while the invention of group IV is drawn to a product that can be used for *in vitro* diagnostics.
- 4. Inventions II, IV and I, III, V are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the processes as claimed can be used for another materially distinct product unrelated to the fusion protein. The invention of group I, III, and V can be used to make fusion proteins and/or proteins not related structurally of functionally to the proteins of group II and IV.Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Application/Control Number: 09/767,370

Art Unit: 1642

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by

a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Christopher H Yaen whose telephone number is 703-305-3586. The examiner can normally be reached on Monday-Friday 9-5.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Anthony Caputa can be reached on 703-308-3995. The fax phone numbers for the organization where this application or proceeding is assigned are 703-308-4242 for regular communications and 703-305-3014 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703-308-0196.
